Shooting for the Stars: Setting Ambitious Sales Goals

Matt Bobick

Distribution & Sales Training Lead

For internal use only

What is a stretch goal?

A stretch goal is an ambitious, challenging objective that goes beyond what is easily achievable or expected. It requires extra effort, innovation, and often involves stepping outside of one's comfort zone to reach. While stretch goals are designed to push limits and inspire growth, they are also realistic enough to be attainable with significant effort, creativity, or resources. Typically used in personal development, business, and team settings, stretch goals aim to inspire motivation and drive toward high-level achievements.

~ ChatGPT

Components of a stretch goal

- ☉ Intentionally difficult
 - ☉ They are meant to be challenging and require going beyond normal capabilities.
- ☉ Motivational tool
 - ☉ The purpose is to push people to innovate and perform at a higher level, even if they don't fully achieve the goal.
- ☉ Not always attainable
 - ☉ While not guaranteed to be reached, the pursuit of a stretch goal can lead to significant progress and positive outcomes.

How do you get there?

- 🌀 Do more of what you're already doing
- 🌀 Do the things you already do differently
- 🌀 Do different things
- 🌀 All of the above

For internal use only

The Process

- 🌀 Prepare
- 🌀 Set the Goal
- 🌀 Simplify
- 🌀 Plan
- 🌀 Communicate
- 🌀 Work the Plan
- 🌀 Evaluate Results
- 🌀 Reset

Prepare

- ⊗ A goal without a plan is a wish. A goal without reason is meaningless.
- ⊗ Without taking time to evaluate why you are where you are, you can't determine how to get where you want to go.
- ⊗ Conduct a SWOT Analysis

Set the Goal

🌐 Use the SMART(ER) Method

🌐 Specific

🌐 Measurable

🌐 Achievable

🌐 Relevant

🌐 Time-bound

🌐 Evaluated*

🌐 Revised*

* Perhaps the most important, yet most overlooked, steps in achieving your goal

For internal use only

Simplify

- ⊗ Ensure your goal is singular
 - ⊗ Combining multiple goals/objectives into a single goal can cause confusion and ambiguity
 - ⊗ Each goal or objective requires its own plan
- ⊗ Break long-term goals into smaller, incremental goals
- ⊗ Set milestones

For internal use only

Plan

🌀 Formulate the plan

- 🌀 What is your best path toward 'solving the problem?'
 - 🌀 Recruiting?
 - 🌀 Marketing?
 - 🌀 Increase product offerings?
 - 🌀 Upskilling your team?
 - 🌀 Establish partnerships within the AmeriLife umbrella?
- 🌀 What are the actions or tactics required?
- 🌀 Focus on the critical few
 - 🌀 Attempting to pull too many levers leads to confusion and exhaustion
- 🌀 Set KPIs

Communicate

- 🌐 Share your goal within, up, and out
 - 🌐 Communicate goals and their respective plans within your organization
 - 🌐 Share the what, when, why, how, and who
 - 🌐 Builds buy-in, engagement, and empowerment
 - 🌐 Communicate to your upline
 - 🌐 Leadership cannot provide adequate support and guidance without knowledge of the objective and its requirements
 - 🌐 Communicate to your trusted peers
 - 🌐 Peer accountability is often the most effective kind
 - 🌐 The combined knowledge of the leaders in this room dwarfs that of any one individual. Use it to your advantage

Work the Plan

- 🌀 Track activities, not just results
 - 🌀 Measuring results without tracking the activity that got you there tells you nothing
 - 🌀 Leading indicators drive results
 - 🌀 Lagging indicators drive anxiety

For internal use only

Evaluate Results

- 🕒 Schedule regular checkpoints to evaluate plan progress
 - 🕒 If results aren't meeting expectations, you **must** be able to answer the question, "Is the plan not working, or are we not working the plan?"

Reset

- 🌀 If it's a plan issue...
 - 🌀 Adjust the plan
 - 🌀 Realign on tactics and actions
 - 🌀 Rinse and repeat
- 🌀 If it's an activity issue...
 - 🌀 Align on how to improve execution
 - 🌀 Realign personnel to better align plan needs and team strengths
 - 🌀 Again, rinse and repeat

What is Data Science?

Data Science is about discovering patterns, trends, and insights from our data that help us make better decisions, uncover new opportunities and drive innovation

AmeriLife has a dedicated Data Science team identifying growth and efficiency opportunities using advanced analytics on our internal and external data.

- Team has even deployed two GenAI (LLM) applications

Data Science Use Cases Discussing Today

- 🌀 Lead Routing Automation
- 🌀 AEP Production Forecasting

Lead Routing Automation

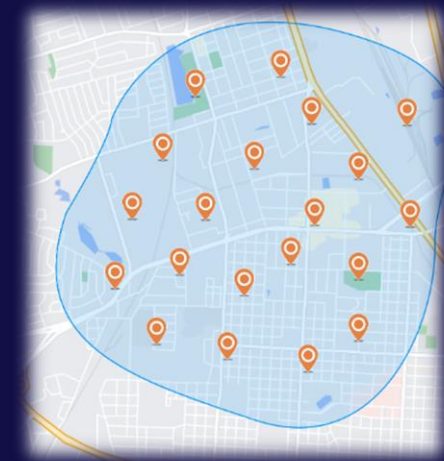

Collaboration between ORCA & Data Science Team

Old Manual Process

- Time-Consuming:
 - Creating each route for agents manually takes a lot of time.
- Inefficient Lead Distribution:
 - Agents may travel long distances and receive old, less desirable leads.
- Scalability Issues:
 - The manual process would struggle to keep up as the business grows, making it hard to handle more agents and leads efficiently.

New Automated Process

- Streamlined Assignments
 - Teams focus on specific areas for efficiency.
 - Older leads are prioritized and kept close together.
 - Exact leads are given in agent's preferred areas.
- Massive Time savings for ORCA
 - Saving over ten hours each week
- Benefits
 - More sales with less travel for agents.
 - Better ROI with timely lead handling.
 - Scalable – as the business grows, there are no bottlenecks

Lead Routing Automation

Next Steps

01

Refine The Algorithm

Capture and analyze historical data.

Implement a system to prioritize leads based on engagement and demographics for better conversion rates.

02

Expand To Additional Affiliates

Roll out the automated lead routing system to additional affiliates, ensuring scalability and consistency across the organization.

AEP Forecasting

Art of the Possible

01

AmeriLife Partnership & Contracting

Partner with AmeriLife and secure contracts with MA carriers

02

Get Ready to Sell

Complete annual carrier trainings for certifications and achieve "Ready to Sell" status!

03

Production

- Submit App: Agent submits app; carrier verifies eligibility.
- Approval & Issuance: Carrier approves and issues policy, notifying applicant.

AEP Production Forecasting

Establish Medicare Advantage certification goals for each affiliate to achieve AmeriLife's 25% growth in new sales during AEP is a highly complex task.

Forecasting Tool Benefits:

- 🕒 Establish certification goals to reach our sales goals
- 🕒 Tracking dashboard to measure progress to meeting those goals
- 🕒 Quantify certification progress impact our AEP production
- 🕒 Agent productivity highlighted to identify drivers and best practice sharing

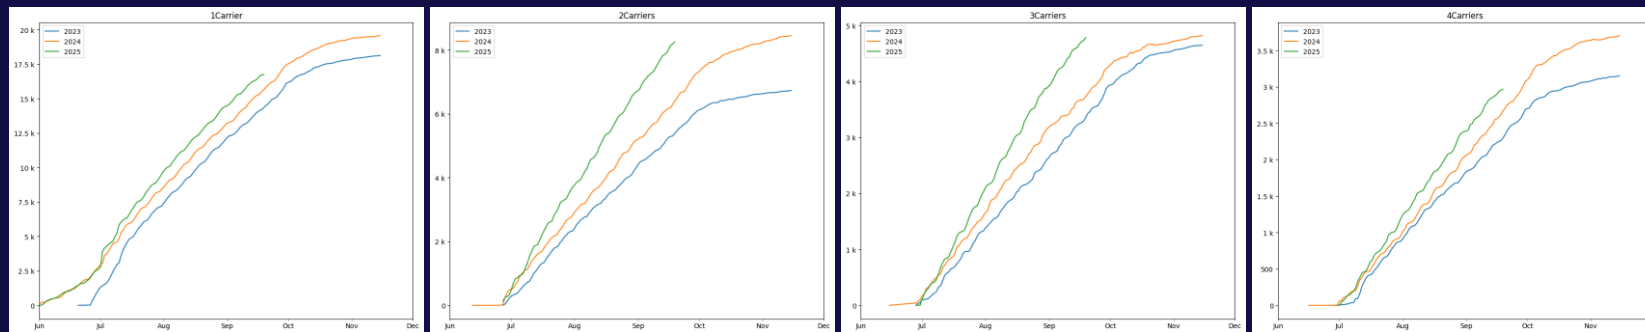

Future: continue to add more data to move upstream in the agent lifecycle
(recruiting and contracting)

AEP Production Forecasting

The AEP Sales Predictor model & dashboard strategically can help drives growth in AEP new sales by providing affiliates with tailored certification goals and forecasts, enabling informed decision-making based on early trends.

The Big 6 AEP Sales Predictor dashboard equips each affiliate with:

- 🕒 Custom Certification Goals: Tailored to guide affiliates toward achieving a sales growth target in AEP new sales for the Big 6 carriers.
- 🕒 AEP Production Forecasts: Based on current certification trends, providing insights into expected sales performance.
- 🕒 Historical Productivity Analysis: Custom plans are crafted from each affiliate's past performance across agent segments (1 carrier, 2 carriers, ..., 6 carrier certified agents)
 - 🕒 This approach allows early identification of areas needing attention to meet a stated sales growth target.

Comparison of the number of certified agents over the course of the cert season for cert years 2023, 2024, and 2025.

AEP Production Forecasting

Next Steps

01

Leverage more data

Bringing more carriers, history, and contracted agent trends in for AEP 2026

02

Refine the algorithm

Building affiliate, carrier, and agent segment specific modeling where data volume permits

03

Improve on the productivity estimation

- Conducting carrier level market analysis to better understand and predict trends
- Conducting affiliate level strategy analysis to anticipate YoY shifts
- Researching affiliate level agent composition
