AMERILIFE | KLEMTEK

AI crawler access — AmeriLife.com

30 October 2026. For Laura, from Brooke Josephs (26 Oct, AmeriLife and LLMs).

AI crawlers can already read public pages. Klemtek added a proposed llms.txt and closed two gaps in robots.txt. That goes live on the next Atlas deploy. No ticket for Cloudflare or Imperva.

Before and after

	Before (live today)	After deploy
Public pages	Open. 9 crawlers got HTTP 200.	Same.
robots.txt	Klemtek file. Allows public pages. Blocks the listed lead and thank-you URLs.	Also blocks /request-support and /national-recruiting.
llms.txt	404.	Plain text. Klemtek proposal. Public pages only.
/contact and /connect	Public.	Still public, unless AmeriLife wants them closed.

Crawlers checked: GPTBot, OAI-SearchBot, ChatGPT-User, ClaudeBot, Claude-SearchBot, Claude-User, PerplexityBot, Perplexity-User, Googlebot. Google-Extended follows the same robots.txt rule.

What we changed

Change	Where
New llms.txt	frontend/lib/llms-txt.ts
robots.txt	frontend/app/robots.ts

We maintain both files in the Next.js app, not in WordPress. Publish with an Atlas deploy. A WordPress cache purge does not update them.

Not our area — no ask today

Layer	What we saw	Ticket
Cloudflare	CDN. Global Edge Security and Under Attack live here. Crawlers were not challenged.	No
Imperva	The other CDN and firewall (header X-CDN: Imperva). Crawlers got the real page.	No

Ask Imperva or WP Engine only if a later site returns a challenge page (Just a moment, Attention Required, or Incapsula) instead of the real page.

Check for each affiliate site

Check	Pass
Homepage	200 and the real title, including with each crawler above
robots.txt	200, plain text, and no Disallow: / for those bots or Google-Extended
Lead and thank-you URLs	Disallow in robots.txt, and noindex on the page
llms.txt	200 and plain text, only if that site should publish one
Challenge page	Stop. That is Imperva or WP Engine, not a code change.

Headless WordPress (headlessameril.wpenginepowered.com) blocks all crawlers. That file is not the one AmeriLife.com serves.
